

Explore with Park Hop

Trees are important for making the air we breathe cleaner, creating oxygen for us to breathe, and making homes for wildlife!

Coniferous trees are trees that keep their sharp, needle-like leaves even through the winter.

Deciduous trees have broader leaves that change color and shed in the fall.

Coniferous

Clues*

- Walk around the upper pond. How many squares can you count next to the brick wall surrounding the fountain? How fast you can hop around the fountain!
- Enjoy the Playground and while you're at it, tell us how many hanging lights are in the picnic shelter.

Clues*

- Walk around the paved walking path that surrounds Kids Planet 1, how many pyramid castle peaks do you see?
- Produce a play or puppet show at the amphitheater inside Kids Planet 2. Look out the window and tell us how many rows of wooden seats you see for your audience to sit on.

Deciduous

How many coniferous trees did you find?

How many deciduous trees did you find?

* Fill out the answers to the clues on the Park Hop Passport at Parkhop.org!
